ABOUT THE SYMPHONY

The Regina Symphony Orchestra has been performing in Regina since 1908 – over 114 years of live music.

Orchestra A mixed group of instruments, with string, wind, brass and percussion instruments.

Conductor The person who stands in front of the orchestra and makes sure that the orchestra or choir is playing the right thing, in the right way, at the right time.

Strings Metal strings stretched across the length of the instrument. Sound is created by bowing, plucking, or striking the strings. Includes instruments that play very high like the violin, and very low like the double bass.

Woodwinds Tubes made of wood, metal and plastic with holes that the musician blows air across to create sound. Most use a wooden reed except for the flute, which has a hole.

Brass Tubes made of brass where the musician creates sound by buzzing their lips into a mouthpiece. These instruments range in size from small and high like the trumpet, to very large and low like the tuba.

Percussion Instruments are struck or hit to create sound. There are many different percussion instruments - almost anything can be a percussion instrument, as long as it makes sound when you strike it.
